New Mexico Mine Health and Safety

DON'T GAMBLE

With Your Safety 2019

There is a certain amount of risk in all that we do. Sometimes we actually welcome risk to appease our sense of adventure. We like to test our skills and push the limits. But we must set those limits and recognize when the consequences are just too severe.

The folks who organize and plan the annual New Mexico Mine Health and Safety Conference would like for you to take a moment before proceeding with whatever task you are preparing to perform (“fix’n to do” in NM-speak) and evaluate the potential harm that could occur. If there is even a remote likelihood that death or serious injury could occur, STOP. **DON'T GAMBLE WITH YOUR SAFETY.** Look for a safer way—one with improved safeguards. Ask for help.
