

## HCC Safety Academy Once Again Awarded Brookwood-Sago Grant

Every year the US Department of Labor awards grants to fund mine safety awareness, education, training in key mining industry states. For the second time in the last three years, HCC Safety Academy has been awarded the coveted Brookwood-Sago grant for the development and delivery of education and training. The grant provides HCC the resources to identify, avoid and prevent unsafe working conditions through the development of new training.

HCC Safety Academy was one of 10 nationwide organizations to be awarded one of the largest grants ever received, for hazard recognition training materials to include virtual reality simulation and traditional materials to train Kansas and Nebraska miners. Safety Academy Director Chrystal Dye was integral in securing the grant to create training materials, promote and conduct mine safety training for educational programs.

The grant, named in honor of 25 miners who died in mine disasters at the Jim Walter Resources #5 mine in Brookwood, Alabama, in 2001, and at the Sago Mine in Buckhannon, West Virginia, in 2006 are awarded annually to support critically important training and education for miners.

# SAFETY ACADEMY UPDATES

## SAFETY ACADEMY TRAINING PRICE INCREASE

**EFFECTIVE OCTOBER 1, 2022**

HCC Safety Academy's pricing schedule will be increasing effective October 1st, 2022. As a non-profit, HCC relies not only on our training fees but also on industry grants to develop and deliver training to customers. The increase allows us to explore technology to develop new training content while maintaining rates at a significantly lower level than other industry facilitators. We thank you for your continuous support and look forward to providing high quality new training. *Our revised pricing schedule is at end of the newsletter.*

## FALL SPORTING CLAY SHOOT

The Sunflower Safety Council recently held its Fall sporting clay shoot benefit in Olathe, Kansas. Members participated in the morning's competitive clay shoot fundraiser for the council's scholarship fund. A huge thanks to all council committee/members who assisted and participated in the event.

# MSHA UPDATES

## MSHA LAUNCHES SAFETY & HEALTH APP FOR MINERS

The Mine Safety and Health Administration recently launched an app that provides the mining community timely information on safety and health practices as well as Notifications. The APP, available on iPhone and Android devices, can be utilized for the following:

- Search for best safety and health practices.
- Resources on Miner's rights and responsibilities
- Notifications of mining accidents and how to prevent them

The new app is another technical and educational resource to provide miners with safety and health information to assist them with Mine, Safety and health responsibilities and concerns.

The app can be download on the iPhone App Store or Google Play Store for android devices. You can also learn more about it at [MSHA.gov](http://MSHA.gov)

## CENTRAL KANSAS SAFETY COUNCIL MEETINGS

This is a group of area Safety professionals who meet and discuss safety issues and a presentation is given regarding different safety topics each month.

This is a great networking opportunity for all safety professionals. For more information, contact us at 620-665-4991.

### 2022 Meetings Dates:

- 11/17/2022
- 12/15/2022

For an estimate, call:  
620-665-4991

## BARTON OSHA NUMBERED COURSES SCHEDULE

RMSM 6010 *	Safety, Health and Environmental Risk Principles	December 12-14, 2022

(\* Denotes Online Zoom Class)

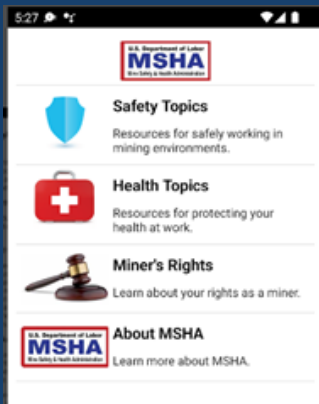

## National Protect Your Hearing Month

October is National Protect your hearing month to raise awareness about noise-induced hearing loss, and share easy steps that people can take to protect their hearing.

The event page can be accessed here: [https://www.cdc.gov/nceh/hearing\\_loss/toolkit/protect\\_hearing\\_month.html](https://www.cdc.gov/nceh/hearing_loss/toolkit/protect_hearing_month.html)

## Miner Safety & Health App

Search and utilize safety and health best practices, and receive notifications of fatal accidents that occur in the mining community.

### Key Features:

- Accident Notifications.
- Accident Prevention

AVAILABLE ON IOS & ANDROID

# OSHA UPDATES

## New Standards for First Aid Kits Go into Effect October 15

The revision of the ANSI standard Z308.1, ***which OSHA cites as a recommended***, nonmandatory source of guidance for minimum first aid kit requirements will go into effect October 15th. Highlighted requirements include:

**Tourniquets Specifications:** The equipment intended to prevent blood loss should be at least 1.5 inches wide and be effective for limb sizes 7-33 inches around.

**Mandatory Foil Blankets:** This measure was enacted after assessing similar international standards and recognizing “the multiple purposes that the item can serve to respond to first aid emergencies.”

**Bleeding Control Kit Guidance:** Contains more advanced first aid supplies to immediately treat life-threatening external bleeding.

Additionally, the revision includes more information to assist employers on how to select additional first aid supplies based on assessment of risks and potential hazards. The standard calls on employers to consider:

- What are the potential hazards?
- What kinds of injuries could/have occurred in relation to these hazards?
- What types of first aid supplies are needed to treat these injuries?

The revision retains the classification of “Class A” and “Class B” kits, introduced in the Z308.1-2015 update and based on the quantity and assortment of supplies. Class A kits generally are suitable for all wounds, minor burns and eye injuries. Class B kits are intended to treat injuries more often found in densely populated workplaces with complex and/or high-risk environments, such as warehouses, factories and outdoor areas.

Employers should conduct a workplace hazard assessment to first determine which class of kit best meets the type of workplace hazards.
